Never got to work on this newsletter as on October 3, 2015 Stephen collapsed while camping at Stephen F Austin State Park. We later found out that his spleen was the size of a football and had ruptured! His spleen was removed in an emergency surgery. He had lost a lot of blood and came out of surgery in critical condition. He was later diagnosed with mantle cell lymphoma.

For indeed he was sick nigh unto death: but God had mercy on him; and not on him only, but on me also, lest I should have sorrow upon sorrow. Philippians 2:27

Much prayer was offered up on our behalf. Many came to encourage us and to bring supplements. He went thru five rounds of chemo and made miraculous progress. He was always the healthiest person receiving chemo.

In 2016 his pet scan came back negative and he is cancer free!

His illness changed our ministry focus to getting more done for the world rather than so much busyness locally! Need to leave a legacy!
